

DEVANSH RASIK PATEL

Graduate Cybersecurity Consultant

+44 7450 758614 | devanshpatel.work@gmail.com | [LinkedIn](#) | [Portfolio](#) | [Medium](#)

PROFESSIONAL SUMMARY

MSc Information Security candidate at UCL (graduating Sep 2026) with hands-on experience across penetration testing, security operations, digital forensics, and risk management. Proven ability to work across varied engagements, translate technical findings into clear stakeholder-facing reports, and support remediation at pace. Disclosed 20 confirmed vulnerabilities across public bug bounty programs (2 Critical, 4 High) with CVSS v3.1-mapped reports and PoCs. Familiar with compliance frameworks including ISO 27001, GDPR, and NIST CSF, and comfortable contributing to both offensive and defensive security initiatives. Eligible for full-time UK work under the Graduate Route from Oct 2026 (2-year validity).

EDUCATION

MSc Information Security, University College London (UCL) *Sep 2025 to Sep 2026*

Dissertation: "Adapting Tor exit node detection techniques to commercial VPN providers." Building a detection pipeline using ASN/BGP clustering, TLS fingerprinting (JA3/JA4), and latency/jitter profiling, evaluated against ground-truth VPN exit IPs. Direct applications to subscriber-platform fraud and abuse detection alongside threat intelligence enrichment.

B.Tech Computer Science (Cyber Security), Symbiosis Skill and Professional University *Sep 2021 to May 2025*

PROFESSIONAL EXPERIENCE

Bug Bounty Researcher (Freelance) | HackerOne, Bugcrowd, YesWeHack *Aug 2024 to Present*

- Provided PoCs, CVSS v3.1 mapped severity ratings, and remediation guidance for 20 responsibly disclosed vulnerabilities (2 Critical, 4 High, 6 Medium, 8 Low), supporting vendor engineering teams in implementing fixes.
- Built ReconRaptor, a Bash and Go automation pipeline integrating subfinder, httpx, and waybackurls, reducing average reconnaissance time per target by approximately 30% across 23 assessments.
- Earned Hall of Fame recognition across multiple programs and published 10+ technical write-ups on InfoSecWriteups and Medium covering XSS, CSRF, SSRF, and broader AppSec topics, reaching 10k+ collective readers.

Cyber Security Analyst (Contract) | Aethris Technologies *Jan 2025 to May 2025*

- Authored a standardised risk and control report template and triage checklist, reducing median investigation closure from 3.4 to 2.3 days (approximately 32% improvement) across 20 cases.
- Produced prioritised risk and control reports for IT, compliance, and leadership stakeholders, tracking remediation progress and advising on control improvements.

Cyber Security Intern (Web/API VAPT) | eSecurify Technologies *Jun 2024 to Dec 2024*

- Supported two rounds of remediation verification with the client's engineering team across a 3-week web and REST API VAPT engagement, helping developers validate fixes and close findings.
- Identified vulnerabilities mapped to OWASP Top 10 and CVSS v3.1 (High severity ≥ 7.0) through manual and automated testing on a 2-person team under senior consultant supervision.
- Co-authored prioritised technical reports with actionable mitigations and policy recommendations, contributing to measurable improvements in the client's application security posture.

Digital Forensics Intern | Cyber Crime Helpline LLP *Jun 2023 to Aug 2023*

- Processed 8 case files using Magnet AXIOM, Autopsy, and FTK; automated repetitive analysis tasks via BAT scripting, reducing manual effort by approximately 50% and improving consistency across cases.

TECHNICAL SKILLS

Offensive Security: Burp Suite, OWASP Top 10, CVSS v3.1, manual web and API VAPT, threat modelling, vulnerability triage and prioritisation

Security Operations and SIEM: Splunk (concepts), ELK Stack (concepts), log analysis, alert triage, vulnerability assessment, incident response support, threat intelligence

Programming and Automation: Python, Bash, Go, SQL, Git

Cloud and Identity: Cloud security concepts (AWS/Azure/GCP fundamentals), IAM/PAM principles, Zero Trust architecture awareness, DevSecOps pipeline concepts

Recon and Network: Nmap, Nessus, Wireshark, Shodan, Maltego, ASN/BGP analysis, TLS fingerprinting (JA3/JA4)

Forensics and SIEM: Magnet AXIOM, Autopsy, FTK, DFIR triage, evidence handling, BAT/Python automation

Frameworks: OWASP Top 10, MITRE ATT&CK, ISO 27001 (familiar), NIST CSF (familiar), GDPR (familiar), NIS2 (aware), DORA (aware)

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC), Sep 2023 | SecOps Group CNSP, Aug 2025 | SecOps Group CAP, Jun 2025 | Cyber Warfare Labs C3SA, Oct 2024 | CompTIA Security+, in progress (2026)
