

Devansh Rasik Patel

Graduate Cyber Security Analyst

+44 7450 758614 | devanshpatel.work@gmail.com | [linkedin.com/in/devanshpatelcybersecurity](https://www.linkedin.com/in/devanshpatelcybersecurity) | zuri09.github.io | medium.com/@devanshpatel930

PROFESSIONAL SUMMARY

Graduate-level Cyber Security Analyst (MSc Information Security, UCL) targeting entry/graduate analyst roles across AppSec, DFIR and incident response. Hands-on experience in VAPT, web/API security testing, digital forensics and OSINT, with Python/Bash automation and CVSS/OWASP-aligned reporting. Delivered measurable efficiencies: 30.2% faster recon across 23 assessments and 32% faster median incident closure across 20 incidents.

EDUCATION

University College London (UCL)

MSc Information Security

London, UK

Sep 2025 – Sep 2026

- Dissertation: adapting Tor exit-node detection techniques to commercial VPN providers (ASN/BGP clustering, TLS fingerprinting via JA3/JA4, latency/jitter profiling).

Symbiosis Skill and Professional University

B.Tech Computer Science (Cyber Security)

India

Sep 2021 – May 2025

EXPERIENCE

Bug Bounty Researcher (Freelance)

ComOlho, YesWeHack

Aug 2024 – Present

Remote

- Validated and responsibly disclosed 61 confirmed vulnerabilities across public and enterprise programs (7 Critical, 5 High, 9 Medium, 40 Low), providing proof-of-concepts, CVSS v3.1 severity ratings and remediation guidance to vendors.
- Automated reconnaissance and triage with Bash/Go and ReconRaptor, reducing average recon time per target from 6h10m to 4h18m (30.2%) across 23 assessments.
- Earned Hall of Fame recognition across multiple programs and published 10+ technical write-ups on InfoSecWriteups and Medium (10k+ collective readers) covering XSS, CSRF and SSRF.

Cyber Security Analyst (Contract)

Aethris Technologies

Jan 2025 – May 2025

Remote

- Performed digital forensic investigations and incident analysis while maintaining chain of custody and evidence integrity.
- Authored a standardised risk/control report template and triage checklist, reducing median investigation closure from 3.4 to 2.3 days (32%) across 20 incidents.
- Produced prioritised risk and control reports for IT, compliance and leadership, tracked remediation to closure and supported post-incident reviews.

Cyber Security Analyst (Web/API VAPT)

eSecurify Technologies

Jun 2024 – Dec 2024

India

- Led a Web and REST API VAPT engagement (3 weeks testing, 10 days reporting/retest), managing a team of 2 testers and running weekly client calls.
- Identified and documented vulnerabilities mapped to the OWASP Top 10 and CVSS v3.1 (High ≥ 7.0), performing two rounds of remediation verification with the client.
- Delivered prioritised technical reports with actionable mitigations and policy recommendations to strengthen the client's application security posture.

Digital Forensics Intern

Cyber Crime Helpline LLP

Jun 2023 – Aug 2023

India

- Processed 8 case files across Android (3), Windows PC (3) and other devices (4); conducted extraction, recovery and timeline analysis to support investigations.
- Used Magnet AXIOM v8.9, MOBILEdit Forensic v9.2, Autopsy v4.20.0 / The Sleuth Kit and FTK v7.6 for artifact processing, and automated repetitive tasks via BAT scripting, cutting manual effort $\sim 50\%$ while improving report consistency.

- Executed performance, security and compatibility testing for web applications, logging defects and collaborating with developers to validate fixes.
- Documented test cases and contributed to release-readiness and QA processes.

PROJECTS

ReconRaptor AI | github.com/Zuri09/ReconRaptor | *Bash, Go, ProjectDiscovery, Ollama/OpenAI* 2024 – Present

- Built an AI-powered recon and triage tool (Bash/Go) chaining ProjectDiscovery tools and gitleaks, validating exposures (CORS, open redirect, GraphQL, cloud storage, takeover) and ranking findings by severity/confidence with local Ollama or OpenAI - 30% faster recon across 23 assessments.

Dorkinator | github.com/Zuri09/Dorkinator | *Python, SearXNG, Ollama (Qwen)* 2025 – Present

- Developed an AI-powered dorking and exposure-triage tool (Python) that generates Google/Bing query sets and uses a local Qwen model to flag public in-scope results as possible exposures, with TXT/CSV/JSON export.

Missing Person Portal | github.com/Zuri09/MissingPersonPortal | *JavaScript, secure-by-design* 2024

- Designed and deployed a privacy-focused reporting portal with secure-by-design controls and secure reporting workflows that reduced user friction.

ADDITIONAL HIGHLIGHTS

- Published 10+ technical articles on InfoSecWriteups and 20+ Medium posts (10k+ collective readers) spanning VAPT, XSS/CSRF, malware analysis and OSINT.
- Active OSINT contributor with 10+ breach-analysis and incident write-ups; community PoCs and blog posts available.

TECHNICAL SKILLS

Offensive Security: Burp Suite, OWASP Top 10, CVSS v3.1, manual web & API VAPT, threat modelling, vulnerability triage & prioritisation

Forensics and SIEM: Magnet AXIOM, Cellebrite UFED, MOBILedit, Autopsy, FTK, DFIR triage, chain of custody, evidence handling

Security Operations and SIEM: Splunk & ELK (concepts), log analysis, alert triage, incident response, post-incident review, threat intelligence

Recon and Network: Nmap, Nessus, Wireshark, Shodan, Maltego, ASN/BGP analysis, TLS fingerprinting (JA3/JA4), OSINT

Programming and Automation: Python, Bash, Go, SQL, Git

Cloud and Identity: AWS/Azure/GCP security fundamentals, IAM/PAM principles, Zero Trust awareness, DevSecOps concepts

Frameworks: MITRE ATT&CK, ISO 27001, NIST CSF, GDPR (familiar), NIS2 & DORA (aware)

CERTIFICATIONS

ISC2 Certified in Cybersecurity (CC), Sep 2023 | SecOps Group CAP (Cred. 10109414), Jun 2025 | SecOps Group CNSP (Cred. 10311312), Aug 2025 | Cyber Warfare Labs C3SA, Oct 2024 | CompTIA Security+ (expected Jan 2026)
